📞 +91 6352465074 ✉️ pradipjaliya9802@gmail.com [in LinkedIn](#) [Github](#)

Cloud DevOps-oriented Full Stack Developer with 3 years of overall experience, working with AWS, GCP, and Azure for application deployment, cloud infrastructure support, CI/CD pipelines, and container-based workflows. Strong Full Stack experience in building and maintaining scalable web applications using Angular, React, Node.js, MSSQL, and MySQL, including Single Page Applications (SPAs) and RESTful APIs. Good problem-solving skills, eager to learn, with basic knowledge of data science and machine learning concepts using Python.

Technical Skills

Cloud & DevOps : AWS, GCP, Azure (Terraform, CI/CD Pipelines, Docker, Kubernetes)
Backend : NodeJS, NestJS (ExpressJS, Rest API, Microservice's, Scheduler)
Database : MySQL, MsSQL, DynamoDB (RDBMS, NoSQL, SQL)
Frontend : Angular, React (HTML, CSS, TS, JS and jQuery)
AI & ML : Python (GenAI, LLM, NumPy, Matplotlib, Pandas, Scikit-Learn)
DSA : C++ (Array, Linklist, Stack, Queue, Tree, Heap, Sorting, Searching)
Tools : Git, GitHub, BitBucket, SourceTree, Postman, Jira, Confluence, Visual Studio, VS Code

Work Experience

Dhitech Solutions (Software Developer)

March 2023 – Current

Gift Card Management System (Angular, Node.js, MySQL, AWS)

- Developed a gift card management system with **Angular**, **Node.js**, **MySQL**, and **AWS**, implementing **role-based access** (Merchant, Admin, etc.).
- Integrated **AWS Cognito** for authentication, **S3** for storage, and added **OTP-based security** for user login.
- Implemented key features such as **gift card purchase**, **redemption**, **transfer** (future/instant), and **expiration management**.
- Optimized backend performance and ensured smooth data flow between frontend and backend.
- Deployed the application on **AWS** using **ECS**, implemented **CI/CD pipelines**, and managed cloud infrastructure with **Terraform**.

Call Clutch (React, Python, AWS Connect, AWS Lambda, API Gateway, DynamoDB)

- Led the development of a **call tracking and management system** using **AWS Connect**, **React**, and **Python Serverless**.
- Migrated from **DynamoDB** to **RDBMS**, and **AWS Lambda**, **API Gateway** to **Node JS**, and **AWS QuickSight** for scalable solutions and data visualization.
- Built features for **call forwarding**, **campaign creation**, and **phone number assignment** with a focus on **scalability** and **high availability**.

Drive PG (AWS, S3, Lambda, Step Function, SES, QuickSight)

- Developed a **data analytics dashboard** for **AWS Marketing Cloud** using **AWS Athena**, **QuickSight**, and **S3** for data visualization.
- Automated **data extraction** and **storage** with **AWS Lambda**, **EventBridge**, and **Step Functions**.
- Created **automated email workflows** using **AWS SES** and integrated marketing campaign data into the **React** dashboard for real-time updates.

Education

LD College of Engineering, Ahmedabad

B.E in Computer Science & Engineering

2019 - 2023

8.02/10 CGPA

Belur Vidhyalaya, Bhavnagar

Higher Secondary Certificate

2017 - 2019

88/100

Belur Vidhyalaya, Bhavnagar

Secondary School Certificate

2015 - 2017

82/100

Certificates

- AWS Certified Cloud Practitioner (AWS - 2025)
- Microsoft Certified Azure Fundamentals (Microsoft - 2025)
- Associate Cloud Engineer Certification (Google - 2025)
- Generative AI Leader Certification (Google - 2026)

Projects

Parking Management System (Full Stack Development)

[Source Code](#)

- * Developed a system for pre-booking parking slots and admin management of parking allocations.
- * Implemented real-time monitoring for company watchmen to track live entries and exits.
- * Enabled real-time updates on parking availability, optimizing slot allocation and parking lot efficiency.
- * Utilized Angular for frontend, ASP.Net for backend, and MS SQL for database, ensuring scalability and security.

Cricket Score Management System (Full Stack Development)

- * Empowered Admins to update live cricket scores and manage match details.
- * Provided Users with easy access to real-time cricket scores and detailed match information.
- * Ensured data integrity and system reliability through robust validation mechanisms.
- * Designed and implemented a dynamic system with Angular, ASP.Net, and MS SQL.

Bulldozer Price Predication (Data Science and Machine Learning)

[Source Code](#)

- * Developed a Machine Learning model using Random Forest Regression to predict bulldozer prices.
- * Achieved 92% accuracy by applying bagging and boosting techniques for performance improvements.
- * Utilized Python libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn for data manipulation, visualization, and model building.
- * Implemented in Jupyter Notebook environment, managed dependencies with Miniconda and Conda.

Competitive Coding

- LeetCode / DSA and SQL / 700+ Problem Solve. [LeetCode](#)
- Kaggle / Use Dataset for Machine Learning Model

Courses

- Basic of Data Science and Machine Learning (Course - 2022)
- SQL Server tutorial for beginners (Course - 2023)
- MERN - Full Stack Developments (Course - 2024)
